## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art of record in view of Katoh et al (US 5,697,008). The admitted prior art of record teaches a toner replenishing container for supplying toner to an image forming apparatus comprising a

container body for storing toner therein; a cap member attached to a mouth of the container body, the cap member having a toner outlet port and a shutter member for opening/closing the toner outlet port. The admitted prior art of record does not teaches an indication member removably attachable to the cap member to indicate a kind of toner in the container, even with the toner replenishing container detached from the image forming apparatus.

Kato et al. teaches an indication member 55 removably attachable to the container to indicate a kind of toner in the container, even with the toner replenishing container is detached from the image forming apparatus.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Kato et al. for an indication member with a container such as taught by the admitted prior art of record to indicate to users the type of toner in the container (Kato et al.; column 3, lines 7-10).

#### *Allowable Subject Matter*

4. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 13-20 are allowed.

#### *Response to Arguments*

6. Applicant's arguments are moot in view of the new grounds of rejection.
